Meritor Parts Xpress

HOW TO USE XACT SEARCH

## Part identification in MPX

How To:

1. Select **Xact Searches** in the red header the most adequate option for the part you are looking for. There are four different options.

2. **Axle Search:** For **ROR Trailer wheel end parts**.

    Select the information on **Axle Type**, the number of **Wheel Bolts**, **Brake Code** and optionally the **Brake Version** (all information can be found on axle plate as described in picture) in the dropdown fields.

   A list of all parts that fit your selection / application will appear.
