BRAKE SHOE XACT SEARCH

Identifying your brake shoe has never been easier with our [Brake Shoe Kit Selector](#), which can be found under our [Xact Search Tool](#). Use this tool to quickly identify the appropriate brake shoe kit that is best suited for your vehicle by following these simple steps!

1.) How to Navigate to our [Brake Shoe Kit Selector](#):

On the [MeritorPartsXpress.com](#) home page, select "[Xact Search](#)" and then select "[Brake Shoe Kits](#)" from the drop down menu.

2.) Identify Your Brake Shoe:

Now it is time to identify your brake shoe. All you need to know is the **Diameter** (inches), **Width** (inches), and your **Manufacturer**.

Brake Shoe Kit Selector

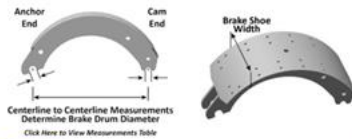

To use this tool, please have information available about your vehicle type, required lining weight rating and application. The tool also has the option to provide us details of the lining you are currently using, and our interchange will present Cummins-Meritor alternatives. If your application or current lining is not represented, please contact your Cummins-Meritor Sales Representative, or our highly trained customer support team to find the correct kit for your application. For the right support, right when you need it, call our Customer Care Center at 888-725-9355 (in Canada, call 800-387-3889).

For 2011 or newer tractor the Friction Type should be RSD – Reduced Stopping Distance. In compliance with FMVSS 121 reduced stopping distance requirements.

Step 1: Identify Brake Shoe

Select from the drill down options below the dimensions and manufacturer so we can identify your brake shoe.

For helpful tips to identify the manufacturer click on the help icon beside the Manufacturer drop down.

3.) Identify Your Application:

Next, you must identify the application of your vehicle using one of the two options we offer.

Option 1: Identify your application and lining weight ratio.

Step 2: Identify Your Application

To assist us in recommending Meritor brake kit options, please provide details of your application or provide details of the competitor lining currently being used.

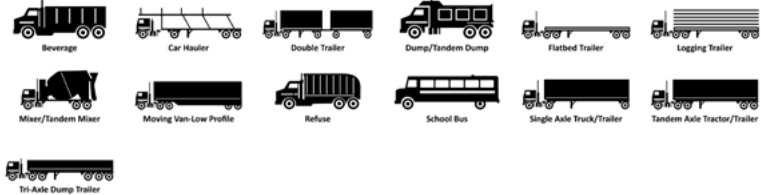

For 2011 or newer tractor the Friction Type should be RSD Reduced Stopping Distance. In compliance with FMVSS 121 reduced stopping distance requirements.
